STOCKS OF COAL THE COUNTRY OVER ON DECLINE

UTAH, NEVADA AND WYOMING STORAGE FILES SMALL

Quite significant, however, is the decrease of close to fifty per cent in the region of the Great Lakes—Increase for three months shown in coke production everywhere.

The Sun Special Service

WASHINGTON, D. C., Apr. 28.—Stocks of bituminous coal in the hands of industrial concerns, the iron and steel industry and public utilities, gas and electric, declined 25 per cent or about 8,000,000 tons in the three months from January 1 to April 1, 1919, according to information collected by the Bureau of Statistics just made public by the United States Fuel Administration. Stocks of bituminous coal in the yards of retail dealers were 40 per cent less on April 1 than on January 1st, but dealers had on hand April 1st quantities of bituminous coal one-fourth as great as was sold and distributed in the first three months of this year. Such stocks in retailers' yards are considered large for April and are the result of the large accumulations last summer and fall and of lack of demand the past few months of open winter weather. The decrease in stocks of bituminous coal in the hands of consumers, including the railroads, in the United States the past three months probably did not exceed 10,000,000 tons. The drop in production of bituminous coal in the same period was 31,000,000 tons compared with January, February and March of 1918.

In proportion to its needs, the small consumer last year was the most successful in accumulating a supply of coal and by the first of last November every nook and corner of the country was piled with bituminous coal. The small user, industries using a car of coal or less a month, represents in number 41,000 units and dollars available semi-anonymously said funds made payable twenty years from the date of their issuance with the option to redeem said funds or any portion thereof at any time after the expiration of ten years shall be issued and sold by the Board of County Commissioners of Carbon County, Utah, for the purpose of defraying the expense of laying out, erecting, constructing, improving and maintaining public roads and highways within the county of Carbon, state of Utah, outside of incorporated cities and towns, and including the expense of erecting all necessary culverts and bridges thereon and thereto which said public roads and highways are described as follows:

Begins at a point about eight miles south from the city of Price, Utah, at a point where the highway most intersects the state road running from Price to Castle Dale, Utah, running westerly to the town of Hartschuh. Beginning at a point about eight miles west of a point where the Hartschuh road intersects the Price-Castle Dale state road, thence northerly to the town of Wattles, ut, thence more easterly to the town of Hartschuh. Beginning at a point about eight miles west from the town of Wattles, ut, thence northerly to the town of Wattles, beginning at a point about one mile northwest from Price where the Price-Hartschuh road intersects the Price-Hartschuh road, thence west to Price, Hartschuh and thence southwesterly to the town of Wattles.

Begins at a point about eight miles south from the town of Price, Utah, at a point where the highway most intersects the state road running from Price to Castle Dale, Utah, running westerly to the town of Hartschuh. Beginning at a point about eight miles west of a point where the Hartschuh road intersects the Price-Castle Dale state road, thence northerly to the town of Wattles, ut, thence more easterly to the town of Hartschuh. Beginning at a point about one mile northwest from Price where the Price-Hartschuh road intersects the Price-Hartschuh road, thence west to Price, Hartschuh and thence southwesterly to the town of Wattles.

Also, beginning at a point about eight miles south from the town of Price, Utah, at a point where the highway most intersects the state road running from Price to Castle Dale, Utah, running westerly to the town of Hartschuh. Beginning at a point about one mile northwest from Price where the Price-Hartschuh road intersects the Price-Hartschuh road, thence west to Price, Hartschuh and thence southwesterly to the town of Wattles.

Also, beginning at a point on the Price-Castle Dale state road, about four miles south of Price, ut, thence in a northwesterly direction to where said road intersects the Wellington road leading to Emery, utah.

All qualified voters who shall have paid a property tax in Carbon county, state of Utah, in the year next preceding this special election are entitled to vote.

The polls will remain open during the time from 2 o'clock in the morning until 10 o'clock at night, being:

BOARDS OF COUNTY COMMISSIONERS,
TOWNSHIP OF CARBON COUNTY, UTAH,
Albert Bryson, Chairman.

Attest: H. C. Smith, County Clerk.
First post, Apr. 28; last May 18, 1919.

DO YOU ENJOY LIFE?

Any man in good physical condition is almost certain to enjoy life, while the bilious and dyspeptic are dependent, do not enjoy their meals and feel miserable a good share of the time. This ill feeling is nearly always unnecessary. A few doses of Chamberlain's Tablets to tone up the stomach, improve the digestion and regulate the bowels is all that is needed. Try it—Advt.

When judges cannot agree on what is constitutional, how can mere laymen be expected to do so?

Lots of men know how to earn money, but are unable to procure them.

CARRON COUNTY LAND CO.

who finds a returned soldier kicking
in his mother's cooking.

The French distrust the Huns, but
for that matter who doesn't?

Kentucky, Ohio, West Virginia, Virginia, Maryland, Delaware and Pennsylvania in the central and eastern sections with increases in stocks ranging from 10 per cent in Kentucky to 126 per cent in Delaware, were the states reporting the increases. In the northeastern part of the country the decreases in New York and New England were small, from 3 to 20 per cent. In the South the largest decrease was 44 per cent in North Carolina. The largest decrease, more than 100 per cent, were in Wisconsin, Minnesota and South Dakota.

In the aggregate the stocks of bituminous coal held by public utilities decreased but 1 per cent, the decreases in some states having been offset by increases in others. Coal for coking in the hands of city gas plants decreased 16 per cent in the three months ended April 1st. Increases in stocks of gas coal were reported in New Jersey, Pennsylvania, Maryland, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Indiana, Michigan and Washington.

Iron and Steel.

Stocks of bituminous coal held by plants engaged in the manufacture of iron and steel decreased 24 per cent from January 1st to April 1st. The largest decreases were in coal for use in blast furnaces, 31 per cent decrease in stocks of high volatile and 33 per cent in stocks of low volatile. Gas coal stocks decreased but 6 per cent and steam coal stocks 17 per cent. The stocks of high volatile gas coal on April 1st were sufficient for nearly three weeks operation and those of low volatile for four weeks. Stocks of gas coal were sufficient for six weeks and of steam coal for seven weeks.

Stocks of gas coal at steel plants in Pennsylvania were increased from January to April by 250 per cent, but in all other states were decreased. Excepting Alabama, stocks of steam coal were decreased in all the states. New York, Pennsylvania, Michigan and West Virginia reported slight increases in stocks of high volatile by-product coal, but decreases in low volatile. In other states reductions in shortage of both grades of by-product coal were the general rule.

Coke Production.

The production of coke, both by-product and beehive, in January, February and March, 1918, is estimated at 12,738,700 net tons, an increase of 307,000 tons or 2.5 per cent compared with the first quarter of 1918. By-product coke increased from 5,321,000 tons in the first quarter of 1918 to 6,739,500 tons in the first quarter of 1919, a gain of 27 per cent. Beehive coke recorded a decrease from 7,116,500 tons in the first quarter of 1918 to 5,950,100 tons the past quarter, a drop of 15 per cent.

The transition from beehive to by-product is indicated by the increase in the capacity of by-product ovens completed, from 6,793,254 tons on April 1, 1918, to 8,570,489 tons on April 1, 1919, an increase of 26 per cent. Since April, 1918, production of by-product coke has been begun in Colorado and in Rhode Island, and considerable increases in capacity have been made in Maryland, New York, Ohio, Pennsylvania, Tennessee, West Virginia, Wisconsin, Alabama, Illinois, Indiana and Kentucky.

The decrease in the production of beehive coke in the first quarter of 1919 compared with 1918 in Pennsylvania was 5 per cent as against a decrease of 40 per cent in all other states.

COAL MINE OWNERS OPPOSE FURTHER FEDERAL CONTROL

Bituminous coal operators from virtually every producing field in the United States at Cleveland, O., the other day unanimously disapproved proposals that the government continue to direct affairs in the industry after the proclamation of peace. The plan, which was proposed by Fuel Administrator Garfield and submitted to operators and miners for ratification or rejection, came before directors of the National Coal Association on referendum vote from approximately twenty-five hundred bituminous operators producing three-fourths of the country's soft coal.

Proposals for the administration of the industry's affairs after the proclamation of peace by an official to be designated by an advisory board of three members appointed by the operators and three members named by the miners. The plan also proposed that the president ask congress to enact legislation necessary to regulate the industry during peace time somewhat after the manner in which it had been regulated during the war.

EMERY AND UNTAH COAL LAND ASSESSED LIGHTLY

The state board of equalization and assessment has decided that no land north of Coal Creek in Iron county shall be considered coal land for assessment purposes. The decision was made after State Geologist William G. Peterson reported that the coal vein in that section was too thin to be mined successfully. Down in Sanpete county, near Wales, where the veins are not in excess of four feet, it was decided to assess the coal lands at fifty dollars per acre. Summit county has eight feet six inches of clean coal, and the other two feet seven inches, and in these lands it has been determined to place a value of seventy-five to a hundred dollars an acre.

In Emery county, Professor Peterson reports, the best coal lands are located some sixty miles away from a railroad and the board decided to as-

BUSINESS CHANGES

Orrin Elmer announces the purchase of the stock of general merchandise, hotel, the feeding stable and sheep dipping corral of Craner & Marble at Colton, Utah. New merchandise is being added to the store and everything called for by the sheepman and cattlemen will be carried in stock at prices consistent with market conditions. A share of the patronage of the public heretofore served at Colton is solicited. Stockmen's and drovers supplies of every description in stock. Hotel accommodations the best.

Orrin Elmer
Successor to Craner & Marble,
COLTON, UTAH

PORK

We are serving patrons of our market with the best corn-fed pork! Fattened and killed by ourselves. Folks who appreciate this best of fresh meat will find it here. Forty-two head are being served over the block in roasts, steaks, chops, sausages and the like. The best of beef, mutton, packinghouse products, fish and game in season and canned goods. Our groceries are fresh.
